Client since 2018

Film & Media Industry

Based in Central London

snkstudios.co.uk

THE CHALLENGE

The TPN (Trusted Partner Network) is a joint venture between two major entertainment industry associations, the Motion Picture Association of America (MPA) and the Content Delivery & Security Association (CDSA), worldwide leaders in third party entertainment industry assessments.

The program helps companies like SNK Studios prevent leaks, breaches, and hacks of their members' movies and television shows prior to their intended release, and seeks to raise security awareness, preparedness, and capabilities within the film audio industry. Dealing with pre-released films and material it is vital that the company is not vulnerable to leaks or cyber-attacks. Although there has always been standards and protocol in the past, having an independent organisation run and regulate this operation, means that the strictest parameters can be set and rigorously checked.

THE PROJECT

The TPN Assessment took 12 months to complete from initial audit and strategic planning to actually delivering the changes needed to comply with the TPN high-security standards.

The audit covered almost 300 separate checks, CJAZ Consulting helped to fulfill all of the IT assessments and checks around data IO, network and IT security of which there were about 100.

THE RESULT

"It's a huge achievement - a year in the making - and in completing the process, SNK Studios joins an elite group of vendors working with the worlds leading creative companies.

The CJAZ Team's flexibility, knowledge and experience wowed the TPN assessors and reflected brilliantly on our company. Basically making them happy, made us very happy indeed!" said Seb Juliver, SNK Studios Founder.

Why choose CJAZ?

Protect client content
Bigger clients
Bigger projects
Cyber secure
More efficient
More competitive
Safeguard reputation

"We absolutely love working with the CJAZ team. Their service is responsive, hands-on and they offer so much experience and knowledge, it's hard to believe they do not work in the film and audio industry!
They are definitely the closest thing we could get to an in-house IT team.

"I can't praise Nick and his team highly enough and I would recommend his services without hesitation."

Seb Juviler, Founder & Head of Studios, SNK Studios
